UI/UX Designer · Designs & Builds Frontend

visvesvarankumaran@gmail.com | 9344838740 | Chennai, 600012 | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

UI/UX Designer with 3+ years of experience crafting intuitive, user-centered interfaces for web and mobile across SaaS, fintech, healthcare, and consumer products used by thousands of users. Skilled in UX research, wireframing, prototyping, usability testing, and building scalable design systems, with a strength for turning complex business logic into clear, simple experiences. A frontend background (React, Angular) lets me collaborate closely with engineers and hand off pixel-accurate, build-ready designs.

WORK EXPERIENCE

UI/UX Designer, Finstein Advisory Service LLP August 2024 – Present

- › Designed end-to-end UX for web and mobile products, owning flows from wireframe to high-fidelity Figma prototype across SaaS, fintech, and healthcare platforms used by thousands of users.
- › Built and maintained a reusable design system in Figma (components, tokens, patterns), cutting design time for new screens and keeping the UI consistent across products.
- › Ran usability testing and turned findings into UI improvements; partnered with developers and shipped parts of the UI myself in HTML/CSS/JS and Angular, improving design-build fidelity and reducing rework.

Frontend Developer, Finstein Advisory Service LLP July 2023 – July 2024

- › Built responsive web interfaces in **HTML, CSS, JavaScript, and Angular** for consumer and B2B products, supporting successful launches to thousands of users.
- › Integrated REST APIs into product dashboards to surface real-time data, and built a reusable component library (buttons, forms, modals, tables) that reduced new-page build time.
- › Performed cross-browser testing across Chrome, Firefox, Safari, and Edge, resolving compatibility issues and reducing UI-related support requests.

KEY PROJECTS

Doctor Payroll Management System · Healthcare SaaS

Tools & Methods: Figma · User flows, wireframing, prototyping, design systems, usability testing

Overview: A payroll automation platform for doctors across multiple hospital branches, where compensation varies by role, seniority (trainee vs. senior), and case type, replacing manual, error-prone salary calculations.

Responsibilities:

- › Led end-to-end UX: user flows, wireframes, and high-fidelity prototypes for the full payroll journey.
- › Designed a configurable **Rule Builder** that turns complex, variable payroll logic into a clear, guided, low-error interface admins can configure without code.
- › Partnered with engineering to ship the design accurately, also contributing to the React frontend.

Pharmaceutical Inventory & Management System · Pharma

Tools & Methods: Figma · Information architecture, responsive design, AI-assisted workflows

Overview: A web application that moved a pharmaceutical company off paper and manual notes onto a digital system for inventory and operations.

Responsibilities:

- › Designed the complete UI, restructuring messy paper-based workflows into a clear, digital experience.
- › Defined the information architecture and responsive layouts; also built the React frontend.

Campaign Management System (CMS) · Fintech

Tech Stack: Angular, TypeScript, REST APIs, NestJS (backend)

Overview: A CMS web app automating loan-related notifications for the Magalir Kulu scheme via SMS and in-app alerts.

Responsibilities:

- › Designed mobile-first notification flows for loan due dates, updates, and new offers to drive engagement.
- › Focused on accessibility and a seamless experience across devices.

Learning Management System (LMS) · EdTech

Tech Stack: Angular, TypeScript, REST APIs, NestJS (backend)

Overview: An e-learning web app for purchasing courses, accessing learning materials, and earning certifications.

Responsibilities:

- › Designed flows for course discovery, enrollment, progress tracking, and certification.
- › Created an intuitive, interactive learning experience from end to end.

CORE SKILLS

UX Design: User-Centered Design, UX Research, User Journeys, Information Architecture, Wireframing, Prototyping, Interaction Design, Usability Testing, Heuristic Evaluation, Accessibility

UI Design: Visual & Interface Design, Design Systems, Responsive Design, Mobile-First Design, Component Libraries, Brand-Aligned UI

Collaboration: Cross-functional Collaboration, Requirements Gathering, Design Reviews, Design Documentation, Agile/Scrum

Tools: Figma, FigJam, Framer, Notion, Cursor, VS Code

AI & Efficiency: Figma AI, Notion AI, Prompt Engineering, AI-Assisted Design Workflows

Frontend (bonus): HTML, CSS, JavaScript, TypeScript, React, Angular. Able to build and hand off pixel-accurate, build-ready UI

EDUCATION

Bachelor of Science, Computer Science 2022
Apollo Arts and Science College, University of Madras

HSC, Computer Science 2019
Periyar Matriculation School

CERTIFICATIONS

- › Core Java
