UI/UX Designer · Designs & Builds Frontend

visvesvarankumaran@gmail.com | 9344838740 | Chennai, 600012 | [Portfolio](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

UI/UX Designer with 3+ years designing web and mobile interfaces and component-based design systems in Figma for **B2B SaaS, fintech, and healthcare** products. I turn complex business logic — variable payroll rules, loan-notification campaigns, inventory operations — into interfaces non-technical teams can run without developer help. A working frontend background (React, Angular, HTML/CSS) makes my developer handoff build-ready, with attention to accessibility, micro-interactions, and web-mobile consistency.

WORK EXPERIENCE

UI/UX Designer · Finstein Advisory Service LLP

August 2024 – Present

- Design end-to-end UX for B2B SaaS, fintech, and healthcare products, owning each flow from user flows and wireframes to high-fidelity Figma prototypes across web and mobile.
- Built and maintain a Figma design system of **120–200 components**, variants, and tokens, cutting new-screen design time from ~3 days to 4–6 hours while keeping the UI consistent across products.
- Ran usability testing across ~15 core flows; after the finance team struggled with the payroll Rule Builder, reworked its language to mirror their Excel-based mental model, removing the primary usability blocker so non-technical staff could configure rules unaided.

Frontend Developer · Finstein Advisory Service LLP

July 2023 – July 2024

- Built responsive interfaces in HTML, CSS, JavaScript, Angular, and React across two products and four supporting services.
- Built a reusable component library with PrimeNG, ShadCN, and Tailwind CSS, and integrated REST APIs for real-time dashboards, cutting new-page build time from ~1.5 days to ~4 hours per two–three screens.
- Resolved cross-browser rendering inconsistencies across Chrome, Firefox, Safari, and Edge — fixing Safari-specific rendering failures — to stabilize the UI on all major browsers.

KEY PROJECTS

Doctor Payroll Management System · Healthcare SaaS

Figma · React — user flows, design systems, usability testing

Payroll automation for **21–25 hospital units and 750–1,000 permanent and temporary doctors** across specialties — cardiology, radiology, anesthesia, neurosurgery, lab — where pay varies by role, seniority, and case type.

- Led end-to-end UX — user flows, wireframes, and high-fidelity prototypes — for the full payroll journey.
- Replaced an ad-hoc, hardcoded salary engine — where every new allowance previously required a developer code change — with a **configurable no-code Rule Builder**, letting the finance team adjust pay rules themselves and process salaries on time without errors.
- Contributed to the React frontend and validated the build across three to four client-and-internal testing phases, narrowing defects each round before release.

Pharmaceutical Inventory & Management System · Pharma

Figma · React — information architecture, responsive design

A year-long engagement replacing a pharmaceutical company's logbook-based operations with a digital system for inventory and accounts.

- › Designed the complete UI across the core modules — **Inventory, Transactions, and Reporting** — restructuring paper-based stock tracking into a structured digital workflow.
- › Defined the information architecture and responsive layouts, and built the React frontend.

Campaign Management System (CMS) · Fintech

Angular · TypeScript · REST APIs · NestJS

A notification platform for the Magalir Kulu loan scheme, reaching **1.5–2 million users**.

- › Designed mobile-first notification flows for two channels: transactional EMI due-date reminders and engagement messages such as festival and birthday outreach.
- › Built to WCAG accessibility standards with consistent behavior across devices.

Learning Management System (LMS) · EdTech

Angular · TypeScript · REST APIs · NestJS

A cross-functional e-learning platform offering **200–500 courses**, combining API-fed content from external coaching partners with in-house guides.

- › Designed flows for course discovery, enrollment, progress tracking, and certification; shipped to the client.

CORE SKILLS

Design Systems & UI — Component-based design, Figma (components, variants, tokens, auto-layout), design systems & component libraries, responsive & mobile-first design, micro-interactions, transitions, motion (Figma/Framer)

UX — User-centered design, user flows, wireframing, prototyping, interaction design, usability testing, user research, information architecture, accessibility (WCAG)

Collaboration & Process — Developer handoff, design documentation, cross-functional collaboration with PMs & engineers, design reviews, web–mobile consistency, Agile/Scrum

Frontend — HTML, CSS, JavaScript, TypeScript, React, Angular, Tailwind CSS (PrimeNG, ShadCN)

Tools & Workflow — Figma, FigJam, Framer, Notion, Cursor, VS Code, Claude; AI-assisted design workflows (Figma AI, Notion AI)

EDUCATION

Bachelor of Science, Computer Science — Apollo Arts and Science College, University of Madras · 2022

HSC, Computer Science — Periyar Matriculation School · 2019
